L'arredamento outdoor ricrea lo stesso comfort dell'interno nel proprio spazio verde.

L'Istà è la doccia che provvede alla frescura tanto cercata nelle afose giornate estive, per poi essere riposta durante l'inverno.

EN Outdoor furniture dedicated to our green spaces recreates the same comfort that can be found indoors. Istà is the shower that provides the much sought-after coolness in the sultry summer days, which can be stored away during the winter.

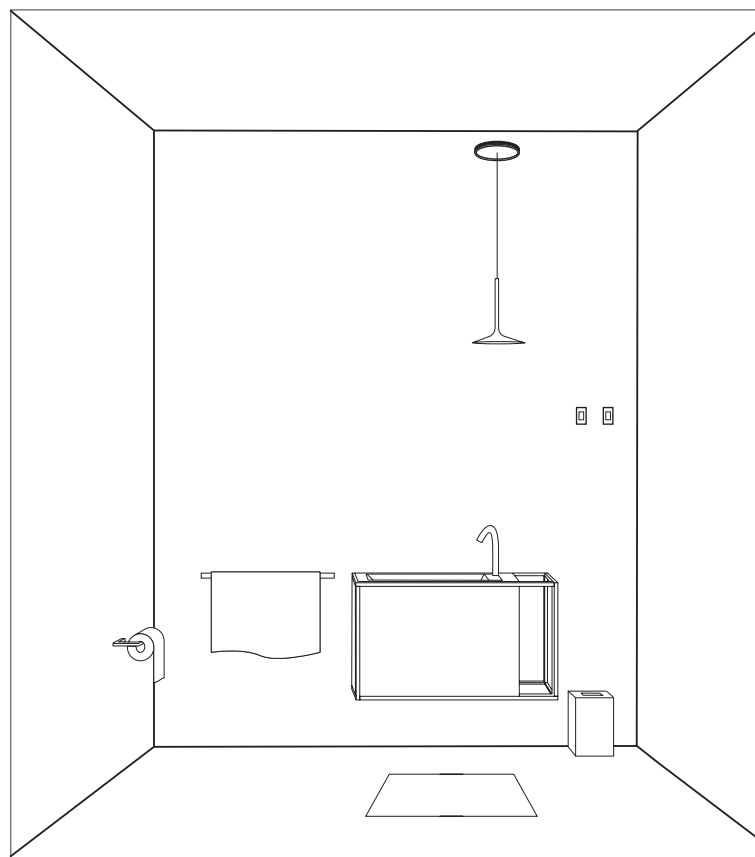

FR Le mobilier outdoor a vocation de recréer à l'extérieur le même confort qu'à l'intérieur. Istà est la douche qui apporte la fraîcheur tant recherchée les jours d'été les plus chauds, pour être ensuite rangée pendant l'hiver.

DE Die Einrichtung im Außenbereich schafft im eigenen grünen Eckchen denselben Komfort, wie im Innenbereich. Istà ist die Dusche, die für jene kühle Frische sorgt, die man sich an schwülen Sommertagen so herbeisehnt. Für den Winter wird sie dann hereingeholt.

Lineabeta utilizza al 100% energia da fonti rinnovabili

Le Garanzie d'Origine GO sono dei certificati internazionali che vengono riconosciuti a quegli impianti di produzione di energia elettrica che rispettano determinate caratteristiche di sostenibilità ambientale. Nati nel 2009, ad oggi sono lo strumento principale per garantire la tracciabilità dell'energia prodotta e sostengono la promozione e lo sviluppo di un mercato su base volontaria dell'energia pulita prodotta da fonti rinnovabili.

L'obiettivo della certificazione GO è quello di garantire al cliente che una quantità di energia pari a quella da lui consumata sia stata prodotta da impianti alimentati da una fonte rinnovabile ben definita in un determinato periodo di tempo. Mediante l'utilizzo di certificati GO, l'acquirente finanzia l'energia pulita testimoniando il proprio impegno a favore dell'ambiente.

Lineabeta e il mondo GREEN

Un impegno costante nel tempo.

Dopo questo primo exploit nel mondo green, l'impegno di Lineabeta si è indirizzato verso il consumo di energia - per la propria attività produttiva - derivata al 100% da fonti rinnovabili.

A questo impegno fa eco la certificazione CO2 della produzione, e la compensazione dell'impatto nell'ambiente di diossido di carbonio di tutte le attività di marketing del marchio Lineabeta, attraverso l'acquisto di Carbon Credits.

L'impegno a favore dell'ambiente è un cammino che Lineabeta desidera percorrere da protagonista, con la consapevolezza che non ci si può mai sentire "abbastanza" soddisfatti dei propri passi e dei propri comportamenti, a favore di un'economia realmente sostenibile dal nostro amato pianeta.

Lineabeta uses 100% energy from renewable sources

The GO - Guarantees of Origin - are recognized international certificates for electricity production factories that respect certain environmental sustainability characteristics. Established

in 2009, they are today the main tool ensuring the traceability of the energy produced and supporting the promotion and development of the market for clean energy produced from renewable resources.

The aim of GO certification is to ensure the customer that an amount of energy equal to that which they have consumed has been produced by factories powered by a well-defined renewable source over a given period of time. Through the use of GO certificates, the buyer finances clean energy by demonstrating its commitment to the environment.

Lineabeta and the GREEN world.

A constant commitment over time.

When the commitment to the environment and the eco-sustainability of production activities were making their first stirrings.

This commitment is characterized by the CO2 certification of the production of showers, and the compensation of the carbon dioxide impact on the environment of all the marketing activities of the Lineabeta brand, through the purchase of Carbon Credits.

The commitment to the environment is a path that Lineabeta wishes to take as a protagonist, while being aware that one is never completely satisfied with his own approaches and behavior, in favor of a truly sustainable economy for our beloved planet.

Lineabeta utilise 100% d'énergie issue de ressources renouvelables

Les Garanties d'Origine GO sont des certificats internationaux attribués aux centrales de production d'électricité qui respectent des caractéristiques déterminées en faveur du développement durable. Mises en place en 2009, elles sont aujourd'hui le principal outil pour garantir la traçabilité de l'énergie produite et pour soutenir la promotion et le développement d'un marché sur base volontariste de l'énergie propre provenant de ressources renouvelables. L'objectif de la certification GO est de garantir au client qu'une quantité d'énergie égale à celle qu'il a consommée a été produite par des usines alimentées par une ressource renouvelable bien définie sur une période de temps donnée. Grâce à l'utilisation de certificats GO, l'acheteur finance une énergie propre en affirmant son engagement pour l'environnement.

Lineabeta et le monde GREEN.

Un engagement constant dans le temps.

Dès les balbutiements de l'engagement en faveur de l'environnement et du développement durable dans le cadre des activités de production,

A cet engagement se fait écho la certification CO2 de la production des parois de douches, et la compensation de l'impact en dioxyde de carbone sur l'environnement de toutes les activités marketing de la marque Lineabeta, par l'achat de Crédits-carbone.

L'engagement en faveur de l'environnement est un chemin que Lineabeta souhaite emprunter en tant que protagoniste, tout en ayant conscience que l'on ne peut jamais se sentir suffisamment satisfait de ses propres démarches et de son comportement, en faveur d'une économie véritablement respectueuse de notre planète bien-aimée.

Lineabeta nutzt 100% Energie aus erneuerbaren Quellen

Die Herkunftsnachweise GO sind internationale Bescheinigungen, die jenen stromproduzierenden Anlagen zuerkannt werden, die bei der ökologischen Nachhaltigkeit bestimmten Eigenschaften genügen. 2009 eingeführt, sind sie heute das wichtigste Instrument, um die Rückverfolgbarkeit der gewonnenen Energie zu gewährleisten. Außerdem fördern sie auf freiwilliger Basis die Entwicklung eines Marktes sauberer, aus erneuerbaren Quellen gewonnener Energie.

Die Zertifizierung GO soll dem Kunden garantieren, dass eine Energiemenge, die der von ihm verbrauchten Menge entspricht, in Anlagen gewonnen worden ist, die in einem bestimmten Zeitraum von einer genau definierten erneuerbaren Quelle gespeist worden sind. Durch die Nutzung von GO-Zertifikaten finanziert der Käufer saubere Energie und bezeugt seinen Einsatz für die Umwelt.

Lineabeta e il mondo GREEN

Ein unaufhörlicher Einsatz.

Sichtbares Zeichen für diese Anstrengungen ist die CO2-Zertifizierung der Duschenproduktion und die Kompensation der Auswirkungen, die Marketingaktivitäten der Marke Lineabeta wegen ihres Kohlendioxid-Ausstoßes auf die Umwelt haben, durch den Erwerb von Kohlenstoffgutschriften (Carbon Credits). Der Einsatz für die Umwelt ist ein Weg, den Lineabeta als Hauptakteur begehen will, in dem Bewusstsein, dass man sich nie zufrieden „genug“ über seine Schritte und seine Verhaltensweisen zugunsten einer für unseren geliebten Planeten wirklich nachhaltigen Wirtschaft fühlen kann.

PICOLA
ACCESSORI _ Accessories _ Accessoires _ Accessoires

PICOLA: piccolina, l'ultima nata in famiglia, quella che gode della simpatia e delle attenzioni di tutti gli altri membri.

Una serie discreta, amata in particolar modo dagli architetti. Non "ruba il palcoscenico", ma lascia spazio alle velleità architettoniche di chi progetta la casa e il bagno.

EN

PICOLA: small, the baby of the family, the one who enjoys the sympathy and attention of all the other members.

A discreet range, loved especially by architects. It does not "steal the stage", but leaves room for the architectural ambitions of those who design the house and the bathroom.

FR

PICOLA : petite fille, la dernière arrivée dans la famille, celle qui bénéficie de la sympathie et de l'attention de tous les autres membres.

Une série discrète, particulièrement appréciée des architectes. Elle ne « vole pas la vedette », mais laisse place aux ambitions architecturales de ceux qui décorent les intérieurs et les salles de bains.

DE

PICOLA: die Kleine, die Letztgeborene der Familie, jene, die die Zuneigung und Aufmerksamkeit aller anderen Familienmitglieder genießt.

Eine dezente Serie, die besonders von den Architekten geliebt wird. Sie "stiehlt nicht die Schau", sondern lässt den architektonischen Ambitionen dessen Raum, der das Haus und das Bad entwirft.

SPECI

Tutte le lastre sono di fabbricazione ecologica realizzate senza piombo né rame. Oltre ad essere sicure per l'ambiente, le lastre specchio di questo tipo sono resistenti all'umidità e alla corrosione, offrendo un'immagine chiara, naturale e realistica.

All the mirrors follow an ecological manufacturing process that do not imply the use of lead or copper. More than being environmentally friendly, the mirrors of this kind are resistant to humidity and corrosion, assuring then a clear, natural and realistic image.

Toutes les plaques sont de fabrication écologique sans plomb ni cuivre. En plus d'être sans danger pour l'environnement, les plaques miroir de ce type résistent à l'humidité et à la corrosion, offrant une image claire, naturelle et réaliste.

Alle Platten sind umweltfreundlich hergestellt ohne Blei oder Kupfer. Spiegelplatten dieser Art sind nicht nur umweltfreundlich, sondern auch feuchtigkeits- und korrosionsbeständig und bieten somit ein klares, natürliches und realistisches Bild.

(AF) Antiappannamento (optional): molti dei nostri specchi possono essere attrezzati con una resistenza antiappannamento che consente di mantenere la superficie dello specchio asciutta e senza condensa. L'antiappannamento si attiva all'accensione della luce principale dello specchio. La superficie coperta dall'antiappannamento varia in proporzione alle dimensioni dello specchio per consentire sempre un'ampia area senza condensa. In caso di specchio con larghezza superiore a 140cm le resistenze antiappannamento saranno sempre due per un migliore posizionamento rispetto al lavabo.

(AF) Steam-free heated pad (optional): many of our mirrors can be equipped with a steam-free heated pad that allows to keep the mirror surface dry and without steam. The pad is turned on at the same time as the main light of the mirror. The pad dimensions change according to the mirror ones, to always keep a wide part with no steam. When the mirror length is more than 140cm, there are always two pads for a better positioning in relation to the basin.

(AF) Antibuée (en option) : beaucoup de nos miroirs peuvent être équipés d'une résistance antibuée qui maintient la surface du miroir sèche et exempte de condensation. Le désembuage est activé lorsque l'éclairage principal du miroir est allumé. La surface couverte par l'antibuée varie proportionnellement à la dimension du miroir pour toujours laisser une grande surface sans condensation. Dans le cas d'un miroir d'une largeur supérieure à 140cm, les résistances antibuée seront toujours au nombre de deux pour un meilleur positionnement par rapport au lavabo.

(AF) Antibeschlag (optional): Viele unserer Spiegel können mit einer Antibeschlagheizung ausgestattet werden, die die Spiegeloberfläche trocken und frei von Kondensation hält. Die Beschlagentfernung wird aktiviert, wenn das Hauptspiegellicht eingeschaltet wird. Die vom Antibeschlag bedeckte Oberfläche variiert proportional zur Größe des Spiegels, damit ein großer Bereich ohne Kondensation ermöglicht wird. Bei einem Spiegel mit einer Breite von mehr als 140 cm sind immer zwei Antibeschlag-Widerstände vorhanden, um eine bessere Positionierung in Bezug auf das Waschbecken zu gewährleisten.

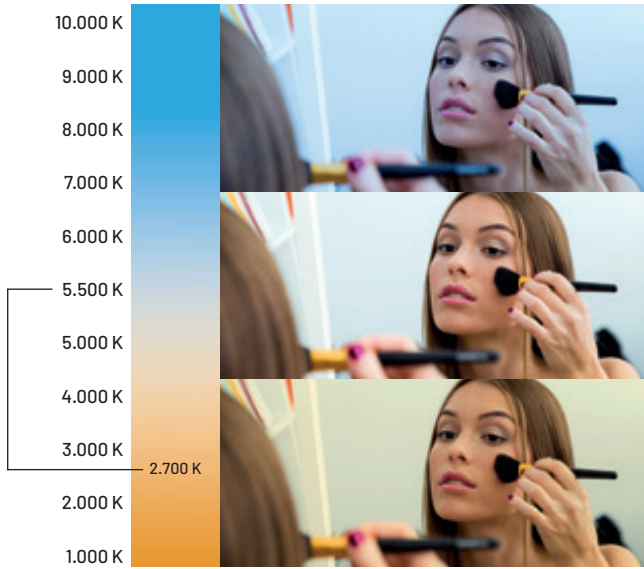

(BT) Bluetooth (optional): collegamento bluetooth per ascoltare direttamente dallo specchio la musica riprodotta dal proprio dispositivo. Lo speciale sistema di diffusione del suono, invece di utilizzare altoparlanti tradizionali, sfrutta il telaio dello specchio come cassa di risonanza; in questo modo offre una qualità del suono ottima su qualsiasi specchio.

(BT) Bluetooth (optional): Bluetooth connection to listen to the music from your device directly through the mirror. This special system of sound diffusion takes advantage of the mirror frame as a sounding board instead of using traditional loudspeakers; in this way, we guarantee a premium sound quality on every mirror even.

(BT) Bluetooth (en option) : Connexion Bluetooth pour écouter la musique sur votre appareil directement depuis le miroir. Le système spécial de diffusion du son, au lieu d'utiliser des haut-parleurs traditionnels, utilise le cadre du miroir comme caisse de résonance ; de cette manière, il offre une excellente qualité sonore sur n'importe quel miroir.

(BT) Bluetooth (optional): Bluetooth-Verbindung, um die gespeicherte Musik direkt über den Spiegel zu hören. Das spezielle Schalldiffusionssystem verwendet anstelle herkömmlicher Lautsprecher den Rahmen des Spiegels als Resonanzkasten. Hervorragende Klangqualität an jedem Spiegel.

La luce degli specchi Lineabeta può essere impostata su colori differenti (temperatura della luce), passando da toni più caldi (minimo 2700 Kelvin) a toni più freddi (massimo 5500 Kelvin).

La temperatura della luce viene misurata in gradi Kelvin (K). Questo valore indica quale tonalità di colore assume la luce emessa da una sorgente luminosa.

The light of Inda mirrors can be set on different colours (light temperature), going from warmer shades (minimum 2700 Kelvin) to colder ones (maximum 5500 Kelvin).

The light temperature is measured in Kelvin degrees (K). This number indicates the colour shade of the light coming from a lighting source.

La lumière des miroirs Inda peut être réglée sur différentes couleurs (température de la lumière), passant des tons les plus chauds (minimum 2700 Kelvin) aux tons les plus froids (maximum 5500 Kelvin).

La température de la lumière se mesure en degrés Kelvin (K). Cette valeur indique la tonalité de couleur que prend la lumière émise par une source lumineuse.

Das Licht der Spiegel INDA kann auf verschiedene Farben (Lichttemperatur) eingestellt werden, die von wärmeren Tönen (mindestens 2700 Kelvin) bis zu kälteren Tönen (maximal 5500 Kelvin) reichen.

Die Lichttemperatur wird in Grad Kelvin (K) gemessen. Dieser Wert gibt an, welchen Farbton, das von einer Lichtquelle abgegebene Licht, annimmt.

IPX6 contro i getti potenti

IPX7 contro l'immersione temporanea

IPX8 contro l'immersione continua

CLASSI DI ISOLAMENTO**⊕ CLASSE I**

La protezione non si basa unicamente sull'isolamento principale, ma anche su una misura di sicurezza supplementare costituita dalla connessione delle parti conduttrici accessibili ad un conduttore di protezione (messa a terra di protezione) che fa capo all'impianto elettrico fisso, in modo tale che le parti conduttrici accessibili non possano andare in tensione in caso di guasto dell'isolamento principale.

□ CLASSE II

Gli apparecchi di classe II sono progettati in modo da non richiedere la connessione di messa a terra. Sono costruiti in modo che un singolo guasto non possa causare il contatto con tensioni pericolose da parte dell'utilizzatore. Ciò è ottenuto realizzando l'involucro del contenitore in materiali isolanti, o comunque facendo in modo che le parti in tensione siano circondate da un doppio strato di materiale isolante o usando isolamenti rinforzati.

⊓ CLASSE III

Un apparecchio viene definito di Classe III quando la protezione contro la folgorazione si affida al fatto che non sono presenti tensioni superiori alla Bassissima tensione di sicurezza SELV (Safety Extra-Low Voltage). In pratica tale apparecchio viene alimentato o da una batteria o da un trasformatore SELV.

CE NORMATIVE TECNICHE

Le direttive 89/336/CEE e 73/23/CEE stabiliscono i requisiti essenziali di sicurezza e compatibilità elettromagnetica a cui devono rispondere i materiali elettrici per poter circolare liberamente all'interno del mercato Europeo. Questi requisiti devono essere verificati mediante opportune prove tecniche e la conformità del materiale deve essere indicata mediante l'apposizione del marchio CE sul prodotto o sul suo imballo. La marchiatura è obbligatoria ed il produttore è direttamente responsabile della rispondenza del prodotto ai requisiti essenziali delle direttive sopracitate. La vendita, la commercializzazione e l'acquisto di prodotti privi della marchiatura, e quindi non rispondenti alle direttive, è punita a termini di legge.

ZONE DI SICUREZZA

Tutti gli apparecchi elettrici vanno collegati al circuito mantenendo una distanza minima di 0,60 m da lavabi, cabine doccia, vasche e 1,20 m da soffioni doccia.

**IP CODE (EN 60529)**

A coding system to indicate the degree of protection provided by an enclosure against accessing of solid foreign objects and/or water.

PROTECTION AGAINST THE INGRESS OF SOLIDS

PROTECTION AGAINST THE INGRESS OF LIQUIDS

IPX0 not protected

IPX1 against vertically dripping

IPX2 against 15° tilted dripping

IPX3 rain protected

IPX4 splashing protected

IPX5 jetting protected

IPX6 powerful jetting protected

IPX7 against temporary immersion

IPX8 against continuous immersion

CLASS LUMINAIRES**⊕ CLASSE I**

Provide protection against electrical shock solely using the base insulation and the safe connection of all exposed conductive parts to an earth conductor.

□ CLASSE II

Provide protection against electrical shock using both the base insulation and an additional or reinforced insulation. This kind of products do not feature a connection to a protective earth conductor.

⚡ CLASSE III

Luminaires provide protection against electrical shock by using Safety Extra Low Voltage (SELV). This kind of products are not permitted to generate higher voltages than the Safety Extra Low Voltage.

CE NORMATIVE NOTES

The directives 89/336/EEC and 73/23/EEC establish the essential requirements for safety and electromagnetic compatibility that the electric and electronic equipment shall comply for freely circulating in the European market. These requirements must be verified by appropriate tests and compliance of the material must be indicated by the CE marking on the product or its packaging. This marking is mandatory and the producer is directly responsible for product compliance with the essential requirements of the abovementioned Directives. The sale, marketing and purchase of products without the markup, and therefore not meet the guidelines, shall be punished by law.

SAFETY ZONES

Electric appliances must be wired to the electric circuit in a minimum distance of 0,60 m from shower cabins, bath tubs, washbasins and of 1,20 m from shower heads.

**CODE IP (EN 60529)**

CLASSES D'ISOLATION**⊕ CLASSE I**

La protection n'est pas seulement basée sur l'isolation principale, mais également sur une mesure de sécurité supplémentaire constituée de la connexion des parties conductrices accessibles à un conducteur de protection (protection vers la terre) qui est rattaché à l'installation électrique fixe, de sorte que les parties conductrices accessibles ne puissent être mises sous tension en cas de panne de l'isolation principale.

□ CLASSE II

Les dispositifs de classe II sont conçus de sorte à ne pas avoir besoin de connexion à la terre. Ils sont fabriqués de façon à ce qu'une simple panne ne puisse causer le contact avec des tensions dangereuses de la part de l'utilisateur. Ce résultat est obtenu en fabriquant l'enveloppe du conteneur en matériau isolant, ou, en tout état de fait, en faisant en sorte que les parties sous tension soit entourées d'une double couche de matériau isolant, ou en utilisant une isolations renforcées.

⚡ CLASSE III

Un appareil est défini de Classe III lorsque sa protection contre l'électrocution est due au fait qu'aucune tension supérieure à la tension basse de sécurité SELV (Safety Extra-Low Voltage) n'est présente. Dans la pratique, cet appareil est alimenté soit par une batterie, soit par un transformateur SELV.

CE RÉGLEMENTATIONS TECHNIQUES

Les directives 89/336/CEE et 73/23/CEE établissent les exigences essentielles de sécurité et compatibilité électromagnétique auxquelles doivent répondre les matériaux électriques afin de pouvoir circuler librement sur le marché européen. Ces exigences doivent être vérifiées par des tests techniques appropriés et la conformité du matériau doit être indiquée par l'apposition de la marque CE sur le produit ou sur son emballage. Le marquage est obligatoire et le producteur est directement responsable de l'adéquation du produit aux exigences essentielles des directives susmentionnées. La vente, la commercialisation et l'achat de produits privés de ce marquage, et donc ne répondant pas aux directives, est puni en terme de loi.

ZONE DE SÉCURITÉ

Tous les appareils électriques sont reliés au circuit en maintenant une distance minimale de 0,60 m des lavabos, cabines de douche, baignoires et de 1,20 m des pommeaux de douche.

**IP CODE (EN 60529)**

SCHUTZ VORM EINDRINGEN VON FLÜSSIGKEITEN

IPX0 ungeschützt

IPX1 gegen den vertikalen Fall von Tropfen

IPX2 gegen fallende Wasser mit 15 ° Neigung

IPX3 gegen Regen

IPX4 gegen Spritzer

IPX5 gegen Strahlwasser

IPX6 gegen starken Strahl

IPX7 gegen zeitweiliges Untertauchen

IPX8 gegen dauerndes Untertauchen

ISOLIERKLASSEN**⊥ KLASSE I**

Der Schutz basiert nicht nur auf der Hauptisolation, sondern auch auf einer zusätzliche Sicherheitsmaßnahme durch die Verbindung der leitenden Teile über einem Schutzleiter (geerdet), der zur feststehenden elektrischen Installation gehört, in der Weise, dass leitfähige Teile nicht unter Spannung gesetzt werden, falls es zu einem Ausfall der Hauptisolation kommt.

□ KLASSE II

Die Klasse-II-Geräte sind so konzipiert, damit sie keine Masseverbindung benötigen. Sie sind so konstruiert, dass ein einzelner Fehler nicht zum Kontakt mit gefährlichen Spannungen für den Benutzer führt. Dies wird durch die Konzeption des Behältermantels in Isoliermaterialien erreicht, oder auf andere Weise, so dass die stromführenden Teile durch eine Doppelschicht aus isolierendem Material oder durch Verwendung von verstärkter Isolierung umgeben sind.

⊠ KLASSE III

Eine Einheit ist definiert als Klasse III, wenn der Schutz gegen elektrischen Schlag auf der Tatsache beruht, dass die Spannungen nur als sehr niedrige Sicherheitsspannungen SELV (Extra Low Voltage Safety) anliegen. In der Praxis wird dies durch eine Batterie oder durch einen SELV Transformator sichergestellt.

CE TECHNISCHE STANDARDS

Richtlinien 89/336 / EWG und 73/23 / EWG Festlegung der grundlegenden Sicherheitsanforderungen und EMV-Anforderungen für elektrische Materialien auf dem europäischen Markt. Diese Anforderungen müssen durch geeignete technische Tests und die Konformität des Materials überprüft werden, und werden angezeigt durch das CE-Zeichen auf dem Produkt oder der Verpackung. Die Kennzeichnung ist obligatorisch und der Hersteller ist direkt verantwortlich für die Produktkonformität mit den grundlegenden Anforderungen der oben genannten Richtlinien. Der Vertrieb, Marketing und der Kauf von Produkten ohne Beschriftung ist daher nicht im Einklang mit Richtlinien und strafbar.

SICHERHEITSSZONE

Alle elektrischen Geräte werden mit der Schaltung verbunden, indem ein Mindestabstand von 0,60 m von Waschbecken gehalten wird, von Duschkabinen und Badewannen und 1,20 m von Duschköpfen.
